

Bio-Check (UK)

EGG-CHECK ELISA

A quantitative **EGG White ELISA** kit to assist in the determination of low levels of **EGG** products in raw materials, environmental swabs, uncooked/cooked foods etc.

EGG ALLERGENS in FOOD: Egg allergy can be severe and is particularly associated with babies and young children (although egg allergy often resolves with age); this makes it vital for sufferers to avoid exposure to egg proteins in food. Food allergic individuals can suffer mild to severe reactions to eggs and therefore eggs have been included in e.g. EU, US and Australian allergens legislation and various allergen handling Guidelines within HACCP.

EGG-CHECK ELISA KITS are designed for the measurement of egg white content by detecting ovomucoid (*Gal d 1*) at low levels in food raw materials, fresh and processed food products (ovomucoid is relatively stable to heat) as well as in environmental swabs. The kits detect ovomucoid protein as a marker of egg white protein content. The assay range is nominally 0.4-8.0 PPM or above of egg white protein (Limit Of Detection 0.15PPM egg white protein).

Food samples are firstly made homogeneous by grinding/chopping etc; a test portion of 0.20g is added to 4.0ml of extraction buffer and incubated at 60°C for 15 minutes (shaking every 2-3 minutes) to extract egg protein. The extract is centrifuged or allowed to settle prior to performing the ELISA (20+20+20 minute incubation times).

DIAGRAM OF ALLERGEN-CHECK ELISA METHODS

The prevalence of food allergies is increasing, the age at onset is decreasing and the condition can have severe effects, including breathing difficulties, anaphylaxis and in rare instances, death. Accordingly, new legislation has been put in place to ensure that allergy sufferers are informed of the presence of key food allergens. In the EC, Directives 2003/89 & 2005/26 became fully implemented in November 2005 and in the USA, the Food Allergen Labeling and Consumer Protection Act (FALCPA) came into force early in 2006; both mandate the clear labelling of particular food allergens. In the **EC** the allergens for which legislation specifically demands inclusion in the ingredient list are: celery/celeriac; cereals (wheat, rye, spelt/kamut or their hybridised strains, barley, oats); crustacea; eggs; fish; lupin; molluscs; mustard; peanuts; sesame; soya & tree nuts (almond, Brazil, cashew, hazelnut, macadamia/Queensland, pecan pistachio, walnut). In the **USA** the list is similar but excludes celery/celeriac, lupin, mollusc, mustard & sesame. Food producers are being advised by food protection agencies such as the UK's FSA and the US FDA to use best practice by restricting the use of so-called "may contain" labelling to products whose manufacturing processes have been assessed using HACCP and for which the presence of undeclared allergens is both significant and unavoidable.

ALLERGEN-CHECK & GLUTEN-CHECK ELISAs : PRODUCT OVERVIEW

*Food sample extracts from these kits are fully compatible and can be used in any other of the kits marked *.

Product Name	Wells	Cat. No.	Product Description
Gluten-Check Including Extraction Kit	96	R6006-2E	Gluten (ó-gliadin) detection by ELISA (LOD <0.5ppm; range 5-110ppm gluten) Includes 1 x A6017 extraction kit for each 48 wells.
	48	R6005-1E	
Fish-Check Including Extraction Kit	96	R6010-2E	Fish protein detection by ELISA (LOD <1ppm; range 5-125ppm cod) Includes 1 x A6015 extraction kit for each 48 wells.
	48	R6009-1E	
The above kits are also available without Extraction kits at lower cost.			
Almond-Check*	96	R6018	Almond protein detection by ELISA (LOD <0.25ppm almond; range 0.5-10ppm almond)
	48	R6019	
β-LG/Milk-Check*	96	R6036	Beta-Lactoglobulin (milk/whey) detection by ELISA (LOD <0.1ppm Skim Milk Powder; range 0.2-7ppm)
	48	R6037	
Casein/Milk-Check	96	R6022	Casein (milk/caseins/caseinates) detection by ELISA (LOD <0.2ppm Skim Milk Powder; range 0.8-16ppm)
	48	R6023	
Cashew-Check*	96	R6046	Cashew protein detection by ELISA (LOD <0.2ppm cashew; range 2-50ppm cashew)
	48	R6047	
Crustacea-Check	96	R6026	Crustacea protein detection by ELISA (LOD 1ppb tropomyosin; range 20-400ppb)
	48	R6027	
Egg-Check*	96	R6032	Egg White protein detection by ELISA (LOD <0.2ppm Egg White Protein; range 0.4-8ppm)
	48	R6033	
Egg-In-Wine-Check	96	R6044	Egg White protein detection by ELISA (LOD <0.1ppm Egg White Protein; range 0.5-15ppm)
	48	R6045	
Hazelnut-Check*	96	R6014	Hazelnut protein detection by ELISA (LOD <0.5ppm hazelnut; range 1-40ppm hazelnut)
	48	R6015	
Lupin-Check*	96	R6030	Lupin protein detection by ELISA (LOD <0.5ppm lupin; range 2-30ppm lupin)
	48	R6031	
Total Milk-Check	96	R6040	Casein & β-LG detection by ELISA (LOD <0.1ppm Skim Milk Powder; range 1-27ppm)
	48	R6041	
Mustard-Check*	96	R6012	Mustard protein detection by ELISA (LOD 1ppm mustard; range 2-50ppm mustard)
	48	R6013	
Peanut-Check*	96	R6020	Peanut protein detection by ELISA (LOD <0.5ppm peanut; range 1-30ppm peanut)
	48	R6021	
Pistachio-Check*	96	R6042	Pistachio protein detection by ELISA (LOD <0.2ppm pistachio; range 1-25ppm pistachio)
	48	R6043	
Sesame-Check*	96	R6028	Sesame protein detection by ELISA (LOD 0.2ppm sesame; range 2-20ppm sesame)
	48	R6029	
Soya-Check*	96	R6024	Soya Trypsin Inhibitor detection by ELISA (LOD <1ppm soya flour; range 2-25ppm soya flour)
	48	R6025	
Walnut-Check*	96	R6016	Walnut protein detection by ELISA (LOD <1ppm walnut; range 2-50ppm walnut)
	48	R6017	

NOTE: The LOD & Range data given above refer to PPM of the commodity itself and - unless indicated otherwise - NOT PPM of allergenic protein, for which the equivalent values are substantially lower.
